How To Update/Install Zoom on Linux

Here is how to install Zoom for the first time or to update to a new version.

1. Go to this link:

https://zoom.us/download?os=linux

For Linux type, select Ubuntu (the one at the top):

nux Type	Choose a Linux type	*	
	Ubuntu		
	Debian		
Download	Mint		
	Oracle Linux		
* Zoom's rpm package	CentOS	rt pa	ackage-signing
key.pub" to import t	RedHat	mis	sing public key
Download Public Key	Fedora		
Key fingerprint: 3960 60	OpenSUSE		
	Arch		
	Other Linux OS		

2. This box will pop up. Don't change anything. Just click the download button:

Linux Type	Ubuntu	Ŧ
OS Architecture	64 bit	Ŧ
Version	14.04+	

3. When it is done downloading, click under the arrow in the lower right corner of the screen to install. The Software Store will open up. Click the word "Install" when it does. It will ask for a password. It is aa123.
